Boulevard

PARK & MEET
Enter the jobsite from
Virginia Beach Boulevard.
Parking will be on your
left in the NE corner of
the site. We will gather
in this area to begin the
tour.

PROJECT DESCRIPTION

The Sentara Cancer Center is a focused concentration of healthcare providers serving those in need of cancer treatment. The building will be home to multiple tenants and seeks to create a focal point for the Sentara Leigh Hospital campus, bringing together expert care teams from Sentara Medical Group, Eastern Virginia Medical School (EVMS), Virginia Oncology Associates, and other community physicians. Outpatient oncology services centralized in one cancer center will give patients and their families access to a single location for multiple appointments and treatments in a healing environment. This convenience and efficiency will better meet their needs, while also helping to facilitate care coordination and collaboration between providers. This state-of-the-art center is modeled after major cancer centers throughout the nation and builds upon the exemplary cancer care services currently provided by Sentara.

LEARNING OBJECTIVES

1. Examine the application of cantilevered structural steel.
2. Review the relationship of the building footprint to program requirements and site constraints.
3. Discuss the composition and variation of the building skin including, aluminum composite metal panel, insulated metal panel, masonry, and curtain wall.
4. Discuss strategies implemented to allow for future vertical expansion

REGISTRATION
At the AIAHR.org website
Events Calendar.
