

**The American Institute of Architects
Continuing Education Systems
AIA-CES Registered Provider Program Outline**

Provider: McKeon Rolling Steel Door Company Provider J497
Program Title: Opening Doors to Design Opportunities with the Model Building Codes
Program: Code 10
Program Length: One Hour
Credits Offered: One Learning Unit—Sustainable Design/Health Safety and Welfare

Target Audience: Architects, Specifiers, Owners/Facility Managers

Program Description: Course has been designed to acquaint the viewer with the many aspects of Fire and Life Safety Code Requirements and how those Code Requirements affect egress and building design

Learning Objectives:

- 1) Will allow the participants to be able to differentiate between fire walls, fire barriers and fire partitions.
- 2) Learners will understand the regulatory standards governing the use and application of opening protectives.
- 3) By examining case studies, attendees will learn the fundamental code requirements that drive the placement of fire walls and fire barriers, their openings and opening protectives.
- 4) By using slides, discussion and case studies, participants will learn the correlation between Life Safety, product application and open design.

Equipment Required: Electrical power availability. Presenter(s) provide laptop. Projector and speakers should be available. Firm please advise if projector is not available and presenter(s) will ensure projector is provided.

Qualifications: Presenter(s) are factory personnel or factory trained and fully authorized Distributor personnel who are authorized to present material based on knowledge of rated fire door assemblies and application. Presenter(s) are considered fire door assembly experts.
